| <b>SUBJECT</b><br>MSD Sludge Disposal Site off of Torrence Avenue   |                                    |  |             |
| <b>SUMMARY OF COMMUNICATION</b><br><p>Stanley Whitebloom telephoned about the above referenced site. He indicated that they tracked down an additional 120 barrels on the site in the bushes and tall grasses adjacent to the area where the original 65 barrels were found. A total of 185 drums contain paint and solvents. The materials came from a company called Trock Disposal. When the original batch of 65 barrels were found, the company claimed that somebody had stolen a dumpster and dumped the barrels on the site. The company was recontacted when the additional barrels were found, and they indicated that a total of 3 dumpsters were stolen. Starting today, Trock Disposal will begin removing the barrels. Everything is expected to be out of the site later this week.</p> <div style="text-align: right; margin-top: 20px;"> <div style="border: 1px solid black; padding: 5px; display: inline-block;">             US EPA RECORDS CENTER REGION 5<br/> <br/>             522815           </div> <div style="margin-top: 20px; color: red; font-family: cursive; font-size: 1.5em;">             HMS file           </div> </div> |                                    |  |             |
